LET's
MEET

THERE IS SOMETHING ROTTEN IN THE STATE OF EU DATA DRIVEN LOGISTICS

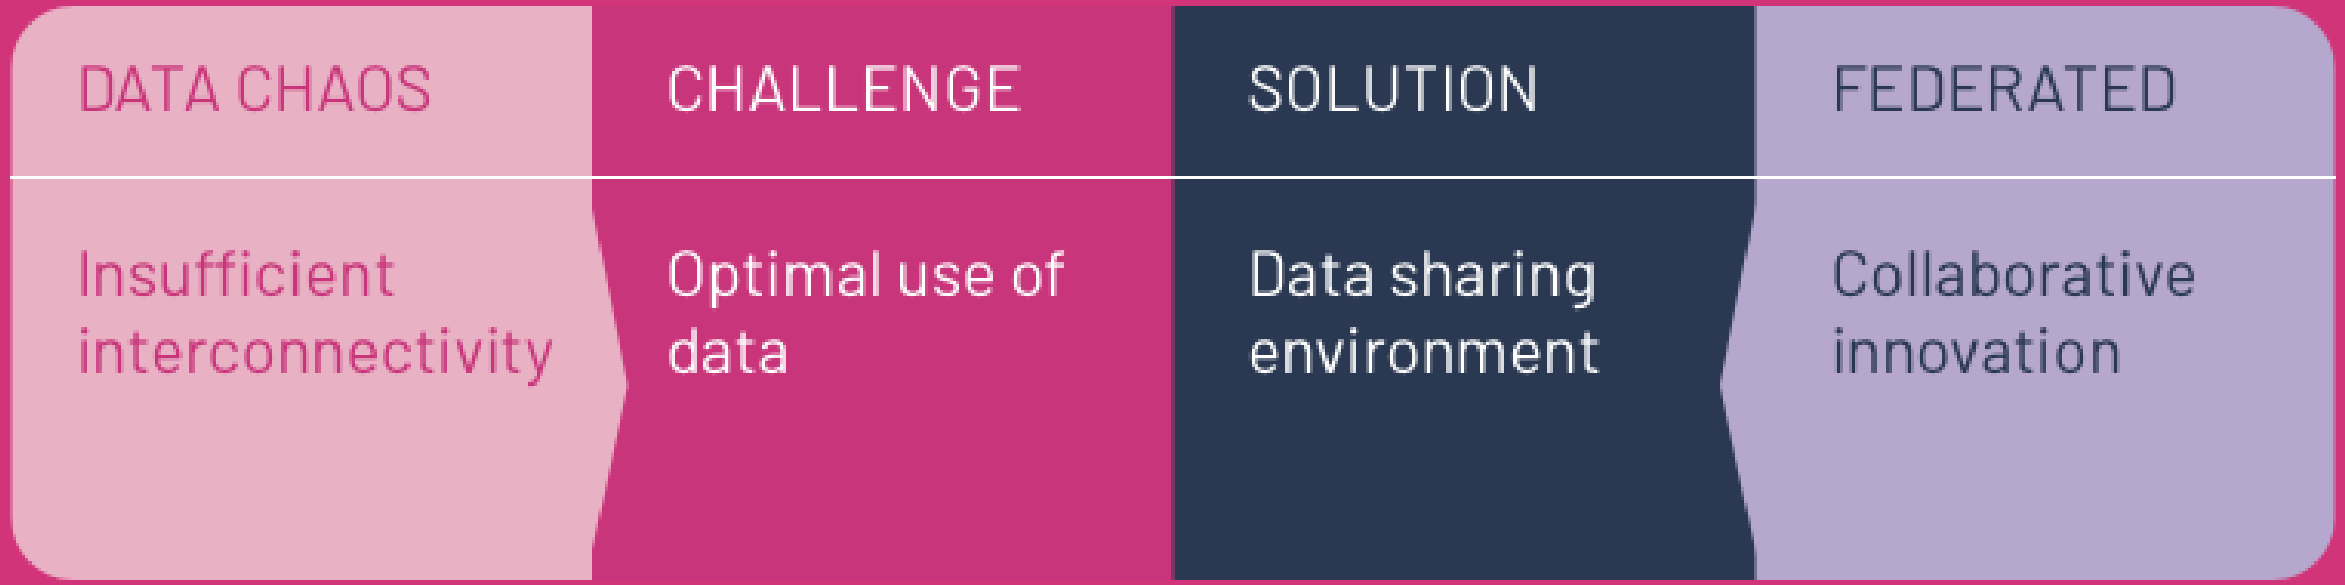
MANY LOGISTICS OPERATORS DO NOT TRUST DATA SHARING

DIGITAL POVERTY
A LACK OF OPERATIONAL BRAINPOWER

DATA, DATA, DATA … LOGISTICS STAKEHOLDERS

OFTEN DO NOT UNDERSTAND ANOTHER

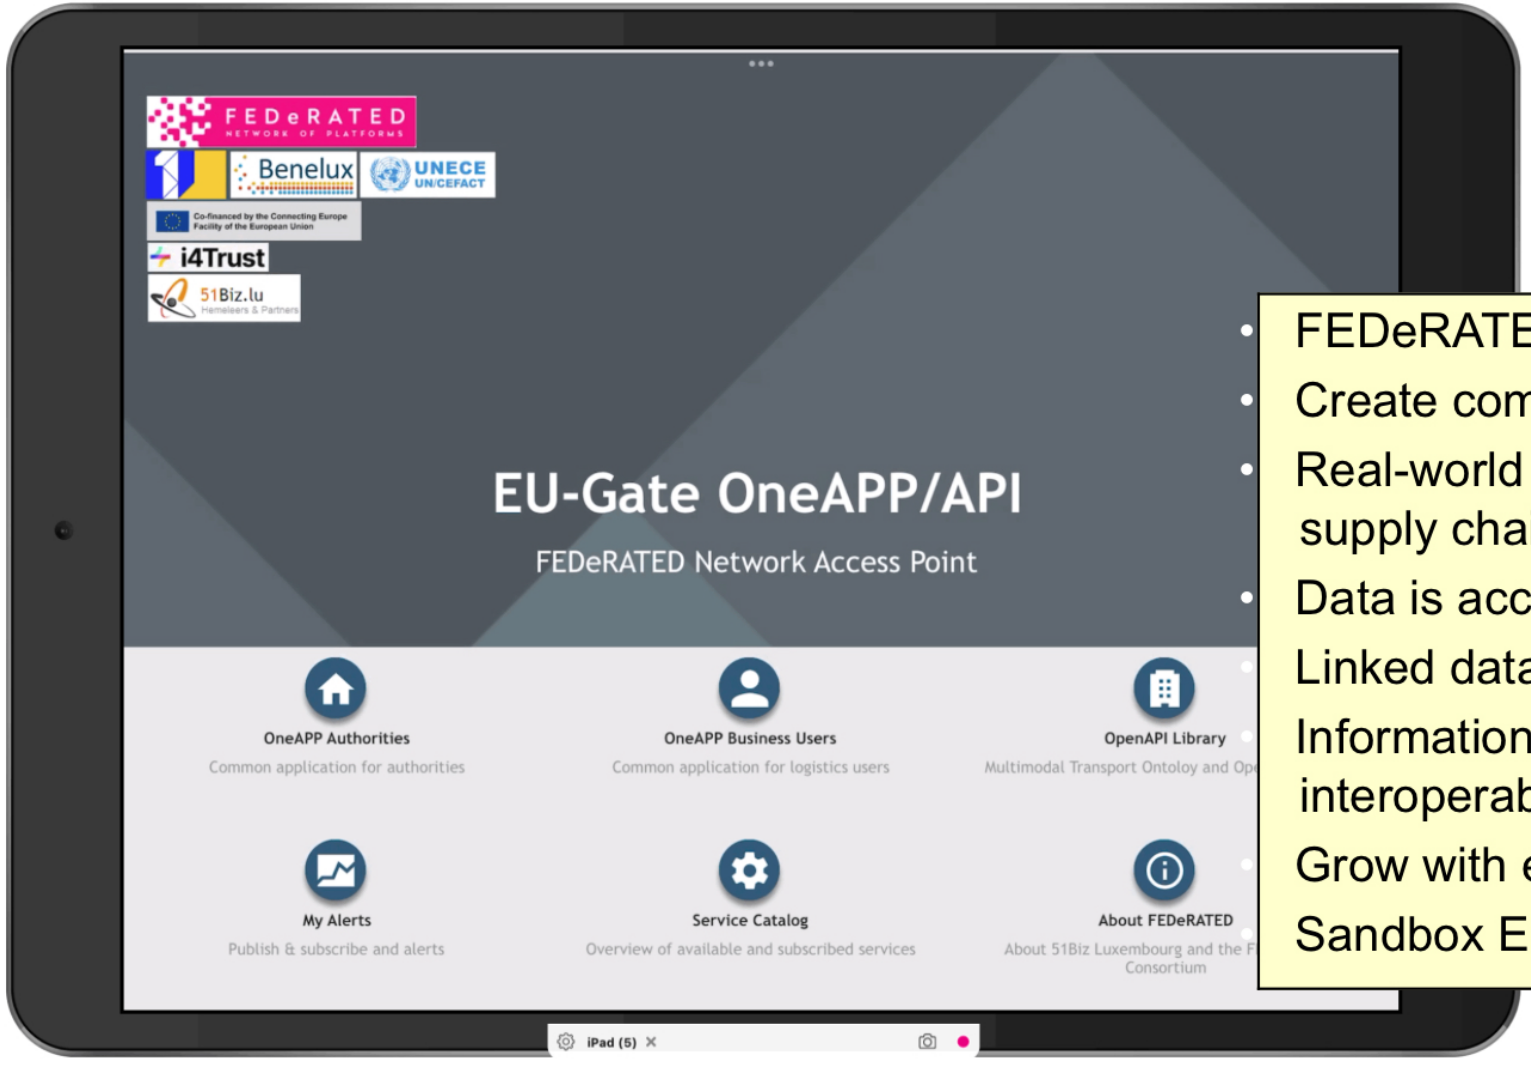
USE THE POWER OF REAL TME DATA



FROM CHAOS TO FEDERATION

THRIVE IN THE SHADOW OF GIANT DATA PLATFORMS

EU-Gate OneAPP/API for Authorities



- FEDeRATED Living Lab 17
- Create common understanding
- Real-world multi-modal reference supply chains
- Data is access at the source
- Linked data, Unique ID
- Information model provides interoperability
- Grow with eFTI and FEDeRATED
- Sandbox EU Reference architecture

THE DATA GATEWAY TO EUROPE

WHAT IS COOKING IN BRUSSELS ?

In Spain, public authorities work closely together in the SIMPLE project - to extend the maritime data gathering processes towards railways and road transportation and their hinterland connections. Also to facilitate and execute the EU eFTI implementation process Customs integration and to make data work for everybody in logistics.

The DATA INCLUSIVE SOCIETY
LAST-MILE
FIRST MILE

IATA is putting in a lot of effort into making digital cargo work -

Turning documents into electronic airway bills leading to seamless M2M multimodal freight connectivity.

#Stay tuned!

The FEDeRATED project is co-financed by the European Commission Connecting Europe Facility (CEF

JOIN US AT THE

EU DATA LOGISTICS FESTIVAL

BRUSSELS - 30 NOVEMBER 2023

Italy has always been a patchwork of solidly connected territories.
In FEDeRATED we developed the "Italian approach"- it consists in connecting maritime transport, cities, villages, ports terminals through digitized transport services and legal compliance.

The FEDeRATED project is co-financed by the European Commission Connecting Europe Facility (CEF)

THE IT FACILITATORS

THE IT PROVIDERS FOR INTEGRATED LOGISTICS

In Finland, public private partnerships are established to enable any transport and cargo movement with practical IT data sharing solutions and stakeholder engagement.

This approach is built upon existing business demands. Daily, operations and borders offer challenges to stay within schedule and share information between the operators. The aim is to share IoT geofencing data for speeding up border crossing and green transport.

Please meet us in Brussels at the EU Data Logistics Festival on 30 November. Register here
